

Depth	Thickness	Sample Number	Lithology
0.36	0.36		SOIL: light brownish-grey, quartzose grains throughout, extremely weathered, very loose.
5.44	5.08		CLAY: light yellowish-grey, ferruginous, iron stained, lateritic nodules throughout, extremely weathered, soft.
18.86	13.42		CARBONACEOUS MUDSTONE: dark brownish-grey, clayey matrix throughout, fresh, soft.
21.52	2.66		CARBONACEOUS SILTSTONE: dark brownish-grey, shaly, increasing in abundance, clayey matrix throughout, fresh, soft.
23.40	1.88		COAL, dull (less than 1%): dark brownish-black, vitrainous bands, fresh, low strength rock.
39.17	15.77		CARBONACEOUS MUDSTONE: dark brownish-grey, clayey matrix throughout, fresh, soft.
39.44	0.27		COAL, dull (less than 1%): dark brownish-black, vitrainous bands, fresh, low strength rock.
42.00	2.56		CARBONACEOUS SILTSTONE: dark brownish-grey, shaly, increasing in abundance, clayey matrix throughout, fresh, soft.
