

Depth	Thickness	Sample Number	Lithology
3.00	3.00		SOIL: dark brownish, quartzose grains throughout, extremely weathered, very loose.
12.60	9.60		CLAY: light reddish brown, clayey matrix throughout, fresh, soft.
17.16	4.56		CARBONACEOUS SILTSTONE: dark brownish grey, shaly, increasing in abundance, clayey matrix throughout, fresh, soft.
23.85	6.69		CARBONACEOUS MUDSTONE: dark brownish grey, shaly, increasing in abundance, clayey matrix throughout, fresh, soft.
25.53	1.68		COAL, mainly dull with frequent bright bands (10-40%): dark brownish black, vitrainous bands, fresh, low strength rock.
47.60	22.07		CARBONACEOUS SILTSTONE: dark brownish grey, shaly, increasing in abundance, fresh, soft.
51.30	3.70		SANDSTONE, very fine: light creamy brown, quartzose grains throughout, fresh, very loose.
60.15	8.85		CARBONACEOUS MUDSTONE: dark brownish grey, shaly, increasing in abundance, clayey matrix throughout, fresh, soft.
