

Depth	Thickness	Sample Number	Lithology
1.07	1.07		SOIL: dark reddish-brown, quartzose grains throughout, ferruginous, iron stained, extremely weathered, very loose.
3.86	2.79		LIMESTONE: dark reddish-brown, ferruginous, iron stained, quartzose grains throughout, extremely weathered, very loose.
6.00	2.14		CLAY: dark reddish-brown, clayey matrix throughout, ferruginous, iron stained, fresh, soft.
16.61	10.61		LIMESTONE: dark reddish-orange, siltstone, clayey matrix throughout, ferruginous, iron stained, fresh, soft.
19.97	3.36		CARBONACEOUS MUDSTONE: dark brownish-grey, clayey matrix throughout, shaly, increasing in abundance, fresh, soft.
21.37	1.40		COAL, dull (less than 1%): dark brownish-black, vitrainous bands, fresh, low strength rock.
31.15	9.78		CARBONACEOUS SILTSTONE: dark brownish-grey, shaly, increasing in abundance, clayey matrix throughout, fresh, soft.
